# SPE JOURNAL Subject and Title Index - 1964

## A

### ABS

**ABS Markets—Present and Future,** W. N. Chandler and R. L. Knapp, *August, p. 681*

**Engineering with Thermoplastics,** Condensation of Akron RETEC Papers, *July, p. 586*

**Extrusion of ABS Compounds,** E. Schwarts and W. J. Coughlin, *January, p. 51*

**Flow Molding of ABS Plastics,** W. B. Evans and H. H. Frimberger, *August, p. 744*

### Acrylics

**XT-Polymers: Tough, Transparent Acrylics,** L. A. Landers and W. C. Meisenhelder, *July, p. 621*

### Adhesion

**Polyglycidyl Polyepichlorohydrin Resins for Casting and Laminating an Evaluation,** R. E. Burge and J. R. Hallstrom, *January, p. 75*

**Possible Research Projects in the Field of Adhesives,** S. M. Atlas and H. F. Mark, *April, p. 314*

### Aging

**Oven Aging of Polypropylene,** J. P. Forsman, *August, p. 729*

### Allylics

**Transfer Mold Design for New Materials and Modern Presses,** R. F. Zecher, *January, p. 61*

### Appliance Industry

**Urethane Foam in the Appliance Industry,** G. W. Recktenwald, *June, p. 528*

### Applications

**Plastics in Telstar,** W. J. Kiernan, *January, p. 80*

### Aromatic

**Thermally Stable Polymers with Aromatic Recurring Units,** C. S. Marvel, *March, p. 219*

### Asbestos Laminates

**The Effect of 200-400°C Temperatures on Asbestos Laminates,** W. Taylor, *July, p. 573*

### Automotive

**Engineering with Thermoplastics,** Condensation of Akron RETEC Papers, *July, p. 586*

**How the Automotive Industry Feels about Plastics Standards,** Results of an SPE Journal Survey, *February, p. 143*

**How to Make Smooth RP Car Bodies,** R. B. Bassler and D. E. Caramante, *August, p. 711*

**Plastics in the Automotive Industry,** E. B. Hilker, *May, p. 437*

## B

### Batteries

**Battery Industry Standards and Specifications,** *September, p. 993*

### Blow Molding

**Basic Practical Aspects of Blow Molding Styrene and PVC Materials,** D. M. Taylor, *November, p. 1218*

**Blow Molding,** G. Pickering, *May, p. 419*

**Blow Molding of Rigid PVC,** S. W. Schaefer, *December, p. 1299*

**Recent Advances in Blow Mold Design,** R. E. Schoeller, *July, p. 609*

### Building

**Engineering with Thermoplastics,** Condensation of Akron RETEC Papers, *July, p. 586*

**Insulated Daylight Glazing Panels,** G. E. Murray, *June, p. 549*

**Plastics in Building,** R. P. Conger, *May, p. 434*

**The Plastics Building Revolution,** D. S. Plumb, *February, p. 121*

## C

### Calendering

**Calendering,** *May, p. 416*

### Carbon Fiber

**Carbon Fiber Plastic Composites,** D. L. Schmidt and W. C. Jones, *February, p. 162*

### Casting

**Polyglycidyl Polyepichlorohydrin Resins for Casting and Laminating: An Evaluation,** R. E. Burge and J. R. Hallstrom, *January, p. 75*

**Rigid Urethane Foam—A Substitute for Styrene Polyester Casting Compound,** J. H. Woodland, *December, p. 1309*

### Catalysts

**Evaluate Catalytic Activity in Rigid Urethane Foam,** E. A. Wonsicki, Jr., *June, p. 547*

### Coloring

**Coloring and Finishing of Plastics,** M. M. Gerson, *May, p. 430*

**Coloring of Unsaturated Polyester Resin, Laminates and Gel Coats,** R. M. Johnston, R. E. Park, *November, p. 1211*

### Cryogenic Temperatures

**Mechanical Behavior of Reinforced Plastics at Cryogenic Temperatures,** N. O. Brink, *October, p. 1123*

### Crystallization

**Crystallization-Modified Polypropylene,** C. J. Kuhre, M. Wales and M. E. Doyle, *October, p. 1113*

## E

### Economics

**ABS Markets—Present and Future,** W. N. Chandler and R. L. Knapp, *August, p. 681*

**Economics of Rotational Molding,** W. C. Johnson, *January, p. 56*

**Future Possibilities for Extruded Plastics,** C. P. MacDermott, *June, p. 523*

**Management Guide for Injection Molding Plants,** M. W. Burkhart, *August, p. 695*

**SPE Journal Plastics Industry Profit Guide,** SPE Journal Staff, *October, p. 1066*

**Transfer Molding: Past, Present & Future,** A. L. Maiocco, *April, p. 339*

**Urethane Foam in the Appliance Industry,** G. W. Rectenwald, *June, p. 528*

**Value Engineering Means Improved Value in Plastic Components,** J. Saks, *September, p. 1004*

### Elastic Behavior

**Elastic Behavior of Low Density Rigid Foams in Structural Applications,** V. A. Matonis, *September, p. 1024*

### Electrical Properties

**Electrical and Mechanical Behaviors of Polymers at Cryogenic Temperatures,** K. N. Mathes, *July, p. 634*

**Electrical Resistivity of Plasticized Polyvinyl Chloride Insulating Materials,** L. H. Wartman, *March, p. 254*

### Electronic Components

**Epoxy Encapsulation of Electronic Components,** J. Delmonte, *November, p. 1233*

### Embrittlement

**Embrittlement of Externally Stressed Polymers in an Active Environment,** W. H. Haslett and L. A. Cohen, *March, p. 246*

### Encapsulating

**Measurements of Internal Stress in Electrical Encapsulating Resins with a Small Solid State Transducer,** G. Dallimore, F. Stucki, D. Kasper, *June, p. 544*

### Environmental Performance

**Stress Cracking: A Correlation Between Rapid Jig Tests and Long Term Environmental Performance,** R. L. Bergen, Jr., *July, p. 630*

### Epoxies

**Epoxy Encapsulation of Electronic Components,** J. Delmonte, *November, p. 1233*

**Epoxies Used in Stained Glass Window Method,** *December, p. 1329*

**Low Temperature Properties of Epoxide Resin Compounds,** G. Gruenwald, *February, p. 154*

**Measurements of Internal Stress in Elec-**

trical Encapsulating Resins with a Small Solid State Transducer, G. Dallimore, F. Stucki, D. Kasper, *June, p. 544*

Polyglycidyl Polyepichlorohydrin Resins for Casting and Laminating: An Evaluation, R. E. Burge and J. R. Hallstrom, *January, p. 75*

Transfer Mold Design for New Materials and Modern Presses, R. F. Zecher, *January, p. 61*

### *Extrusion*

External Vacuum Sizing of Thermoplastic Pipe and Tubing, R. Doherty and P. J. Cotter, *October, p. 1093*

Extrusion, P. N. Richardson, *May, p. 411*
Extrusion Bibliography Supplement, *August, p. 707*

Extrusion of ABS Compounds, E. Schwarts and W. J. Coughlin, *January, p. 51*

Feeding the Single Screw Extruder, R. L. Miller, *November, p. 1183*

Flow Rate and Pressure Drop Relationships for Multi-Section Screw Extruders, R. B. Edwards, J. E. Fogg, J. T. Regan and R. R. Kraybill, *March, p. 234*

Future Possibilities for Extruded Plastics, C. P. MacDermott, *June, p. 523*

Measurement and Analysis of Extruder Stability, B. H. Maddock, *December, p. 1277*

Measurement of Screw and Plastic Temperature Profiles in Extruders, D. I. Marshall, I. Klein and R. H. Uhl, *April, p. 329*

Quality Low Temperature Extrusion, R. B. Gregory, *August, p. 703*

Recent Developments in Processing Plastics on Single and Multiple Screw Extruders, H. Domininghaus, *July, p. 593*

Temperature Profile of Molten Plastic Flowing in a Cylindrical Duct, H. Schott and W. S. Kaghan, *February, p. 139*

Vented Extruders—A Review, L. G. P. Smits, *September, p. 999*

## F

### *Filament Winding*

Combined Effects of Pre-stress and Humidity Cycling Upon Filament-Wound Internal Pressure Vessels, S. Brelant, L. Petker, and K. W. Smith, *September, p. 1019*

Maximizing Design Stress of Filament Wound Structures, H. R. Sheppard and R. N. Sampson, *April, p. 347*

Standards for Filament Wound Plastics, J. W. Davis, *July, p. 601*

### *Film*

Corona Discharge Treatment of Polypropylene Films, J. J. Levitsky and W. S. Kaghan, *December, p. 1305*

Heat Sealability of Polyethylene Film, G. L. Dighton, *September, p. 1036*

New Developments in Polypropylene Film, W. U. Funk, *May, p. 441*

Tensile Impact Testing of Films, T. J. Dunn and P. Kelly, *July, p. 615*

### *Flow Rate*

Flow Rate and Pressure Drop Relationships for Multi-Section Screw Extruders, R. B. Edwards, J. E. Fogg, J. T. Regan, and R. R. Kraybill, *March, p. 234*

### *Finishing*

Coloring and Finishing of Plastics, M. M. Gerson, *May, p. 430*

### *Foams*

Elastic Behavior of Low Density Rigid Foams in Structural Applications, V. A. Matonis. *September, p. 1024*

### *Forming*

Forming, R. E. Freyer, *May, p. 420*

## H

### *Heat Sealing*

Heat Sealability of Polyethylene Film, G. L. Dighton, *September, p. 1036*

### *Hobbing*

Hobbing Raised and Undercut Sections, N. S. Metrocavich, *November, p. 1191*

### *Humidity Aging*

A Quantitative Test Method for Humidity Aging of Plasticized PVC Compounds, J. W. Little and F. C. Stroehlein, *April, p. 366*

### *Humidity Cycling*

Combined Effects of Pre-stress and Humidity Cycling Upon Filament-Wound Internal Pressure Vessels, S. Brelant, L. Petker, and K. W. Smith, *September, p. 1019*

### *Hydraulics*

SPE Journal Guide to Injection Molding Hydraulics, *P. D. Kohl, April, p. 321*

## I

### *Injection Molding*

Flow Molding of ABS Plastics, W. B. Evans and H. H. Frimberger, *August, p. 744*

Improved Surface of Acetal Moldings, W. C. Filbert and T. M. Roder, *February, p. 149*

Injection Molding, C. L. Weir, *May, p. 410*

Management Guide for Injection Molding Plants, M. W. Burkhart, *August, p. 695*

New Techniques in Shrinkage Control, H. Holt, *June, p. 491*

Optimizing the Operating Variables of a Screw Injection Molding Machine, J. A. Poarch and P. R. Schwaegerle, *March, p. 262*

Injection Molding of Polyphenylene Oxide, E. P. Cizek and E. S. Jaskot, *December, p. 1295*

Shall I Convert My Plunger Machine? W. B. Campbell and P. Noble, *September, p. 1011*

SPE Journal Guide to Injection Molding Hydraulics, P. D. Kohl, *April, p. 321*

Transfer Mold Design for New Materials and Modern Presses, R. F. Zecher, *January, p. 61*

### *Instrumentation*

Instrumentation for Control, E. K. Miles, *October, p. 1120*

### *Insulation*

Plastics—And Double Insulation, L. I. Naturman, *December, p. 1268*
Plastics in Electrical Insulation, A. E. Javitz, *May, p. 435*

### *ISO*

Report of Activities of ISO/TC-61, J. B. Howard and N. A. Skow, *April, p. 336*

## J

### *Jig Tests*

Stress Cracking: A Correlation Between Rapid Jig Tests and Long Term Environmental Performance, R. L. Bergen, Jr., *July, p. 630*

## L

### *Laminating*

Polyglycidyl Polyepichlorohydrin Resins for Casting and Laminating: An Evaluation, R. E. Burge and J. R. Hallstrom, *January, p. 75*

## M

### *Materials*

Future Possibilities for Extruded Plastics, C. P. MacDermott, *June, p. 523*

### *Mechanical Properties*

Electrical and Mechanical Behaviors of Polymers at Cryogenic Temperatures, K. N. Mathes, *July, p. 634*

### *Melt Density*

A New Method for Determining Melt Density as a Function of Pressure and Temperature, B. W. Terry, K. Yang, *June, p. 540*

### *Melt Indexing*

Factors in Melt Indexing of Polyolefins, A. Ruden, H. P. Screiber, *June, p. 533*

### *Melt Temperature*

Measurement of Screw and Plastic Temperature Profiles in Extruders, D. I. Marshall, I. Klein and R. U. Uhl, *April, p. 329*

Temperature Profile of Molten Plastic Flowing in a Cylindrical Duct, H. Schott and W. S. Kaghan, *February, p. 139*

Trouble Shooting of Temperature Measuring Systems, K. H. Emich, *April, p. 363*

### *Metallizing*

New Interest in Metallizing via the Plating Route, L. I. Naturman, *April, p. 305*

### *Mold Design*

Hobbing Raised and Undercut Sections, N. S. Metrocavich, *November, p. 1191*
Metal Mold Design and Construction, C. C. Davis, Jr., *May, p. 422*

**New Inexpensive Mold for Polymer Evaluation,** P. L. Barrick, R. H. Crawford, B. L. Espy, W. F. Robb and E. E. Sawin, *January, p. 69*
**Recent Advances in Blow Mold Design,** R. E. Schoeller, *July, p. 609*
**Two New Plastics Tooling Steels,** J. H. Bateman, *February, p. 130*

O

*Operating Variables*
**Optimizing the Operating Variables of a Screw Injection Molding Machine,** J. A. Poarch and P. R. Schwaegerle, *March, p. 262*

P

*Pipe*
**External Vacuum Sizing of Thermoplastic Pipe and Tubing,** R. Doherty and P. J. Cotter, *October, p. 1093*
**Glass Fiber Reinforced Thermoplastic Lined Steel Pipe,** W. F. Mick and D. G. Moeller, *March, p. 268*
**Plastics Pipe: Design, Fabrication and Markets,** Condensation of Papers presented at Newark Section SPE RETEC, *November, p. 1168*

*Plasticizers*
**Electrical Resistivity of Plasticized Polyvinyl Chloride Insulating Materials,** L. H. Wartman, *March, p. 254*
**Plasticization of Polyvinyl Chloride by Oxo Alkyl Phthalates,** R. D. Deanin, E. C. Smith, B. J. Skowronski, R. I. Lent, A. R. Backstrom and J. M. Lesser, *May, p. 462*

*Plating*
**New Interest in Metallizing via the Plating Route,** L. I. Naturman, *April, p. 305*

*Polyacetals*
**Engineering with Thermoplastics,** Condensation of Akron RETEC Papers, *July, p. 586*
**Improved Surface of Acetal Moldings,** W. C. Filbert and T. M. Roder, *February, p. 149*

*Polycarbonates*
**Engineering with Thermoplastics,** Condensation of Akron RETEC Papers, *July, p. 586*

*Polyester*
**Rigid Urethane Foam—A Substitute for Styrene Polyester Casting Compound,** J. H. Woodland, *December, p. 1309*
**The Tensile Properties of Polyesters at Elevated Temperatures,** A. C. Filson, *May, p. 459*
**Coloring of Unsaturated Polyester Resin, Laminates and Gel Coats,** R. M. Johnston and R. E. Park, *November, p. 1211*

*Polyethylene*
**Heat Sealability of Polyethylene Film,** G. L. Dighton, *September, p. 1036*
**Rotational Molding Equipment for Polyethylene Powders,** A. B. Zimmerman and W. H. Stabenau, *May, p. 455*
**Polyethylene—Review and Preview,** S. M. Atlas and H. F. Mark, *January, p. 40*
**Temperature Profile of Molten Plastic Flowing in a Cylindrical Duct,** H. Schott, and W. S. Kaghan, *February, p. 139*

*Polyimides*
**Engineering with Thermoplastics,** Condensation of Akron RETEC Papers, *July, p. 586*

*Polymerization*
**Polyethylene—Review and Preview,** S. M. Atlas and H. F. Mark, *January, p. 40*

*Polyolefins*
**Engineering with Thermoplastics,** Condensation of Akron RETEC Papers, *July, p. 586*
**Factors in Melt Indexing of Polyolefins,** A. Rudin, H. P. Schreiber, *June, p. 533*
**Polyolefins,** R. F. Jones, *May, p. 425*

*Polypropylene*
**Corona Discharge Treatment of Polypropylene Films,** J. J. Levitsky and W. S. Kaghan, *December, p. 1305*
**Oven Aging of Polypropylene,** J. P. Forsman, *August, p. 729*
**New Developments in Polypropylene Film,** W. U. Funk, *May, p. 441*
**Crystallization-Modified Polypropylene,** C. J. Kuhre, M. Wales and M. E. Doyle, *October, p. 1113*

*Polystyrene*
**Basic Practical Aspects of Blow Molding Styrene and PVC Materials,** D. M. Taylor, *November, p. 1218*
**Blow Molding of Rigid PVC,** S. W. Schaefer, *December*
**Engineering with Thermoplastics,** Condensation of Akron RETEC Papers, *July, p. 586*

*Polyvinyl Chloride*
**A Quantitative Test Method for Humidity Aging of Plasticized PVC Compounds,** J. W. Little and F. C. Stroehlein, *April, p. 366*
**Basic Practical Aspects of Blow Molding Styrene and PVC Materials,** D. M. Taylor, *November, p. 1218*
**Electrical Resistivity of Plasticized Polyvinyl Chloride Insulating Materials,** L. H. Wartman, *March, p. 254*
**Plasticization of Polyvinyl Chloride by Oxo Alkyl Phthalates,** R. D. Deanin, E. C. Smith, B. J. Skowronski, R. I. Lent, A. R. Backstrom and J. M. Lesser, *May, p. 462*
**Rigid PVC,** L. I. Naturman, *June, p. 507*

*Pressure Drop*
**Flow Rate and Pressure Drop Relationships for Multi-Section Screw Extruders,** R. B. Edwards, J. E. Fogg, J. T. Regan, and R. R. Kraybill, *March, p. 234*

*Properties*
**Low Temperature Properties of Epoxide Resin Compounds,** G. Gruenwald, *February, p. 154*

*PVDC*
**Optimizing the Operating Variables of a Screw Injection Molding Machine,** J. A. Poarch and P. R. Schwaegerle, *March, p. 262*

R

*Regional Technical Conferences*
**ABS Plastics,** Connecticut Section, *May, p. 484*
**Advances in Moldmaking and Mold Design—**sponsored by the Newark Section, *June, p. 531*
**Engineering with Thermoplastics—**sponsored by the Akron Section, *June, p. 531*
**Joining of Plastics,** Newark Section, *January, p. 35*
**New Polyolefin Copolymers,** Philadelphia Section, *November, p. 1179*
**Plastic Pipe,** Newark Section, *October, p. 1110*
**Plastics and Adhesives in the Space Age,** New York Section, *April, p. 301*
**Plastics Extrusion—Materials, Theory and Applications—**Chicago Section, *May, p. 484*
**Plastics Sandwich Laminates,** Buffalo Section, *July, p. 582*
**Reinforced Plastics in Transportation,** Cleveland Section, *August, p. 939*
**Rigid PVC—Creativity, Versatility, Progress,** Quebec Section, *December, p. 1266*
**Stability of Polymers,** Baltimore-Washington Section, *May, p. 472*
**Thermosets for the Electrical Industry,** Milwaukee Section, *April, p. 381*

*Reinforced Plastics*
**Carbon Fiber Plastic Composites,** D. L. Schmidt and W. C. Jones, *February, p. 162*
**Combined Effects of Pre-stress and Humidity Cycling Upon Filament-Wound Internal Pressure Vessels,** S. Brelant, L. Petker, and K. W. Smith, *September, p. 1019*
**The Effect of 200-400°C Temperatures on Asbestos Laminates,** W. Taylor, *July, p. 573*
**Glass Fiber Reinforced Thermoplastic Lined Steel Pipe,** W. F. Mick and D. G. Moeller, *March, p. 268*
**How to Make Smooth RP Car Bodies,** R. B. Bassler and D. E. Caramante, *August, p. 711*
**Maximizing Design Stress of Filament Wound Structures,** H. R. Sheppard and R. N. Sampson, *April, p. 347*
**Mechanical Behavior of Reinforced Plastics at Cryogenic Temperatures,** N. O. Brink, *October, p. 1123*
**Porous Reinforced Plastic Laminates,** J. J. Damico and W. R. McGlone, *April, p. 369*
**Reinforced Plastics,** D. V. Rosato, *May, p. 414*
**Stress-Strain Characteristics of Glass Fiber Reinforced Polyesters,** W. Krolikowski, *September, p. 1031*
**Whisker-Reinforced Plastics for Space Applications,** W. H. Sutton, B. W. Rosen and D. G. Flom, *November, p. 1203*

*Rotational Molding*
**Economics of Rotational Molding,** W. C. Johnson, *January, p. 56*
**Rotational Molding Equipment for Polyethylene Powders,** A. B. Zimmerman, and W. H. Stabenau, *May, p. 455*

## S

### Silicones

**Transfer Mold Design for New Materials and Modern Presses,** R. F. Zecher, *January, p. 61*

### Sizing

**External Vacuum Sizing of Thermoplastic Pipe and Tubing,** R. Doherty and P. J. Cotter, *October, p. 1093*

### Society

**Announcing the 21st Annual Technical Conference (ANTEC),** *October, p. 1097, December, p. 1315*
**Constitution and By-Laws of the Society of Plastics Engineers, Inc.,** *August, p. 929*
**Education Committee News,** *June, p. 566*
**PAG's . . . What Are They?,** *June, p. 551*
**Plastics Abstracting Service Developments,** *August, p. 942, October, 1141, November, p. 1230*
**President's Cup Awarded to L. H. Whittington,** *March, p. 216*
**SPE Council Elects 1965 Officers,** *December, p. 1261*
**SPE in the Next Decade,** *June, p. 555*
**New Editorial Advisory Board Appointments,** *December, p. 1262*
**SPE Journal Staff Appointments,** *October, p. 1106*
**SPE Publication Committee Establishes Goals for 1964,** *April, p. 310*
**21st Annual Technical Conference—A Call for Papers,** *February, p. 141, April, p. 354*

### Space Applications

**Whisker-Reinforced Plastics for Space Applications,** W. H. Sutton, B. W. Rosen and D. G. Flom, *November, p. 1203*

### Stability

**Measurement and Analysis of Extruder Stability,** B. H. Maddock, *December*

### Stabilizers

**Formulating Modern Stabilizers for Vinyls,** *J. R. Darby, August, p. 738*

### Standards

**Battery Industry Standards and Specifications,** *September, p. 993*
**Engineering Plastics Standards,** A. C. Webber, *October, p. 1101*
**How the Automotive Industry Feels about Plastics Standards,** Results of SPE Journal Survey, *February, p. 143*
**Progress in Standards for Plastics,** J. B. DeCoste, *December, p. 1285*
**Report of Activities of ISO/TC-61,** J. B. Howard and N. A. Skow, *April, p. 336*
**Standards for Filament Wound Plastics,** J. W. Davis, *July, p. 601*
**The Plastics Standards Digest,** *August, p. 721*

### Steels

**Two New Plastics Tooling Steels,** J. H. Bateman, *February, p. 130*

### Stress

**Combined Effects of Pre-stress and Humidity Cycling Upon Filament-Wound Internal Pressure Vessels,** S. Brelant, L. Petker, and K. W. Smith, *September, p. 1019*
**Embrittlement of Externally Stressed Polymers in an Active Environment,** W. H. Haslett and L. A. Cohen, *March, p. 246*
**Maximizing Design Stress of Filament Wound Structures,** H. R. Sheppard and R. N. Sampson, *April, p. 347*
**Measurements of Internal Stress in Electrical Encapsulating Resins with a Small Solid State Transducer,** G. Dallimore, F. Stucki, D. Kasper, *June, p. 544*

### Stress Cracking

**Stress Cracking:**
**A Correlation Between Rapid Jig Tests and Long Term Environmental Performance,** R. L. Bergen, Jr., *July, p. 630*

### Stress-Strain Characteristics

**Stress-Strain Characteristics of Glass Fiber Reinforced Polyesters,** W. Krolikowski, *September, p. 1031*

### Structural Applications

**Elastic Behavior of Low Density Rigid Foams in Structural Applications,** V. A. Matonis, *September, p. 1024*

### Surface

**Improved Surface of Acetal Moldings,** W. C. Filbert and T. M. Roder, *February, p. 149*

## T

### Tensile Properties

**The Tensile Properties of Polyesters at Elevated Temperatures,** A. C. Filson, *May, p. 459*

### Testing

**A New Method for Determining Melt Density as a Function of Pressure and Temperature,** B. W. Terry, K. Yang, *June, p. 540*
**A Quantitative Test Method for Humidity Aging of Plasticized PVC Compounds,** J. W. Little and F. C. Stroehlein, *April, p. 366*
**Embrittlement of Externally Stressed Polymers in an Active Environment,** W. H. Haslett and L. A. Cohen, *March, p. 246*
**Low Temperature Properties of Epoxide Resin Compounds,** G. Gruenwald, *February, p. 154*
**New Inexpensive Mold for Polymer Evaluation,** P. L. Barrick, R. H. Crawford, B. L. Espy, W. F. Robb and E. E. Sawin, *January, p. 69*
**Stress Cracking: A Correlation Between Rapid Jig Tests and Long Term Environmental Performance,** R. L. Bergen, Jr., *July, p. 630*
**Tensile Impact Testing of Films,** T. J. Dunn and P. Kelly, *July, p. 615*

### Thermally Stable Polymers

**Thermally Stable Polymers with Aromatic Recurring Units,** C. S. Marvel, *March, p. 219*

### Thermoplastics

**Engineering with Thermoplastics,** Condensation of Akron RETEC Papers, *July, p. 586*

### Thermosets

**Thermosetting Molding,** E. W. Vaill, *May, p. 412*
**The Thermoset Industry—Outlook,** L. I. Naturman, *September, p. 980*
**Transfer Mold Design for New Materials and Modern Presses,** R. F. Zecher, *January, p. 61*

### Transducers

**Measurements of Internal Stress in Electrical Encapsulating Resins with a Small Solid State Transducer,** G. Dallimore, F. Stucki, D. Kasper, *June, p. 544*

### Transfer Molding

**Transfer Mold Design for New Materials and Modern Presses,** R. F. Zecher, *January, p. 61*
**Transfer Molding: Past, Present & Future,** A. L. Maiocco, *April, p. 339*

### Tubing

**External Vacuum Sizing of Thermoplastic Pipe and Tubing,** R. Doherty and P. J. Cotter, *October, p. 1093*

## U

### Urethane Foam

**Evaluate Catalytic Activity in Rigid Urethane Foam,** E. A. Wonsicki, Jr., *June, p. 547*
**Refinements in Molding One-Shot Flexible Polyether Urethane Foam,** P. G. Gemeinhardt, G. E. Reid, S. A. Bingham, J. L. Eakin and J. F. Szabat, *April, p. 357*
**Rigid Urethane Foam—A Substitute for Styrene Polyester Casting Compound,** J. H. Woodland, *December, p. 1309*
**Urethane Foam in the Appliance Industry,** G. W. Recktenwald, *June, p. 528*

## V

### Value Engineering

**Value Engineering Means Improved Value in Plastic Components,** J. Saks, *September, p. 1004*

### Vinyls

**Formulating Modern Stabilizers for Vinyls,** J. R. Darby, *August, p. 738*
**The Plastics Building Revolution,** D. S. Plumb, *February, p. 121*
**Vinyl Plastics,** W. F. Waychoff, *May, p. 426*

## W

### Whiskers

**Whisker-Reinforced Plastics for Space Applications,** W. H. Sutton, B. W. Rosen and D. G. Flom, *November, p. 1203*

# Authors' Index
